WEB DEVELOPER

HELLO, I'M CHRISTIAN WARE

I specialize in building web apps with Next JS and React. Because of my background in design and finance, I understand the aesthetic and business side to any project. While websites have to make good impressions on their visitors, they should also motivate them to action. I am looking for an opportunity to apply these principles in a role as a Developer; below are some projects which showcase my skills in web development.

Projects

TACO BELL REDESIGN
livemas.dev

GitHub:
github.com/ChristianWare/Tacobell-ii

Description:
This project is a redesign of Taco Bell's website. The front end was built with next.js, and the CMS is Sanity.io. The styling was done with CSS Modules so that I can have the most flexibility for design. Each menu item has its slug page where more details are given on that particular item.

FONTS & FOOTERS
fontsandfooters.com

GitHub:
github.com/ChristianWare/chris_ware_agency_ii

Description:
Fonts and Footers is a web design agency that builds direct booking websites for vacation rental property owners. This project utilizes Next.js and react on the front-end, sanity.io for the headless CMS, and MDX for markdown with node.js to navigate the file system. All styling was done with CSS Modules.

ELITE RETREAT RENTALS
case-study-one.vercel.app/

GitHub:
https://github.com/ChristianWare/Case-Study-One

Description:
Elite Retreat Rentals is a fictional website I built to show potential clients what a personalized booking website could look like. It allows users to view all available vacation rental properties listed by the owner, and they can make reservations on each property via the full-function booking system. Users can pay for each reservation in advance using Stripe. All are built in Next.js with Mongodb for the database and Next Auth for the authentication.

Economics
Rio Salado College
Tempe, AZ

2006–2010
Advertising Design
New York City College of Technology
Brooklyn, NY

2002–2006
Art
Fiorello H. LaGuardia High School
New York, New York

Projects Continued....

NIER TRANSPORTATION
www.niertransportation.com/

GitHub:
https://github.com/ChristianWare/Nier-Transport-Redesign

Description:
Nier Transportation is a client who needed a new website that advertised his luxury black car driving service. This project is primarily front-end built with Next.js and has a markdown blog that utilizes the local file system with node.js. All styling was done with CSS Modules.

Helped to build the following NFT based websites:
probablynothing.io,
thebattlebunnies.io/
photosynthesis.io/

HELLO, I'M CHRISTIAN WARE.

To Whom It May Concern,

I have extensive knowledge of HTML, CSS, JavaScript React and Next JS. I specialize in building web apps with Next JS and React. Because of my background in design and finance, I understand the aesthetic and business side to any project. While websites have to make good impressions on their visitors, they should also motivate them to action.

I have experience designing, coding, and deploying a variety of websites, from Single Page Applications to fully functional E-commerce Stores. My personal website, chrisware.dev, reflects my attention to detail in making sure each app is aesthetically pleasing and semantically structured.

I am passionate about web development, which led me to pursue a path of self taught developers take. Instead of stoping at the basics of HTML, CSS and Javascript, I took it upon myself to master React, and Next JS. In addition to this, I constantly seek out new technologies and staying up-to-date on trends in the field. I would be thrilled to be do the same as a member of your team.

Thank you for taking the time to review my Information. I look forward to sharing more about my skills and experiences. Feel free to contact me at 623.632.6780 or chris.ware.dev@gmail.com.

Best Regards,

CHRISTIAN WARE
